

**NIEKOĽKO ÚLOH O ŠTVORSTENE NA ROZVOJ PRIESTOROVEJ
PREDSTAVIVOSTI**

**SOME TASKS CULTIVATING SPATIAL IMAGINATION RELATED TO
TETRAHEDRON**

LUCIA RUMANOVÁ, DANIEL HNYK

ABSTRACT. In the article we will look to the spatial imagination, the tetrahedron and its properties. We give several types of tasks which are the suitable for "training" spatial vision. In the last part of the contribution we will address the use of teaching aids and educational software which can help to improve the teaching of solid geometry.

Keywords: spartial imagination, tetrahedron, net, software, solid

Classification: Q64, G14
